

## **HWg-STE plus: Ethernet thermometer with digital inputs**

---

**WEB hygrometer, thermometer with two dry contact inputs. LAN interface with SNMP and e-mail output. Works with the SensDesk portal.**

The connected temperature, humidity sensors and two dry contacts can be monitored using a WEB interface. E-mail alert is sent if the temperature exceeds a limit or a contact is closed. Supports SNMP and works with the SensDesk portal.

- Supplied with an AC adapter and a temperature sensor
- Sends an e-mail whenever excessive value is sensed
- Simple installation, supports DHCP
- A second sensor (temperature or humidity) can be connected
- Monitor the device from anywhere using the SensDesk.com online portal

Typical applications include temperature and door monitoring in cabinets, refrigerators, technology rooms, etc.

- **Online demo:** <http://hwg-ste-plus.hwg.cz>
- **Ethernet:** RJ45 (100BASE-T)
- **Web:** Built-in Web server
- **Digital Input:** 2x dry contact input
- **Sensors:** 2x RJ11 (max 2 temperature or humidity sensors)
- **M2M communication protocols:** SNMP, XML, HWg-Push
- **Alerts to values out of the safe range:** E-mail
- **Recommended online portal:** **SensDesk.com** – Free online portal
- **Recommended software:** **HWg-PDMS** – Logging, graphs, export to MS Excel
